

Components

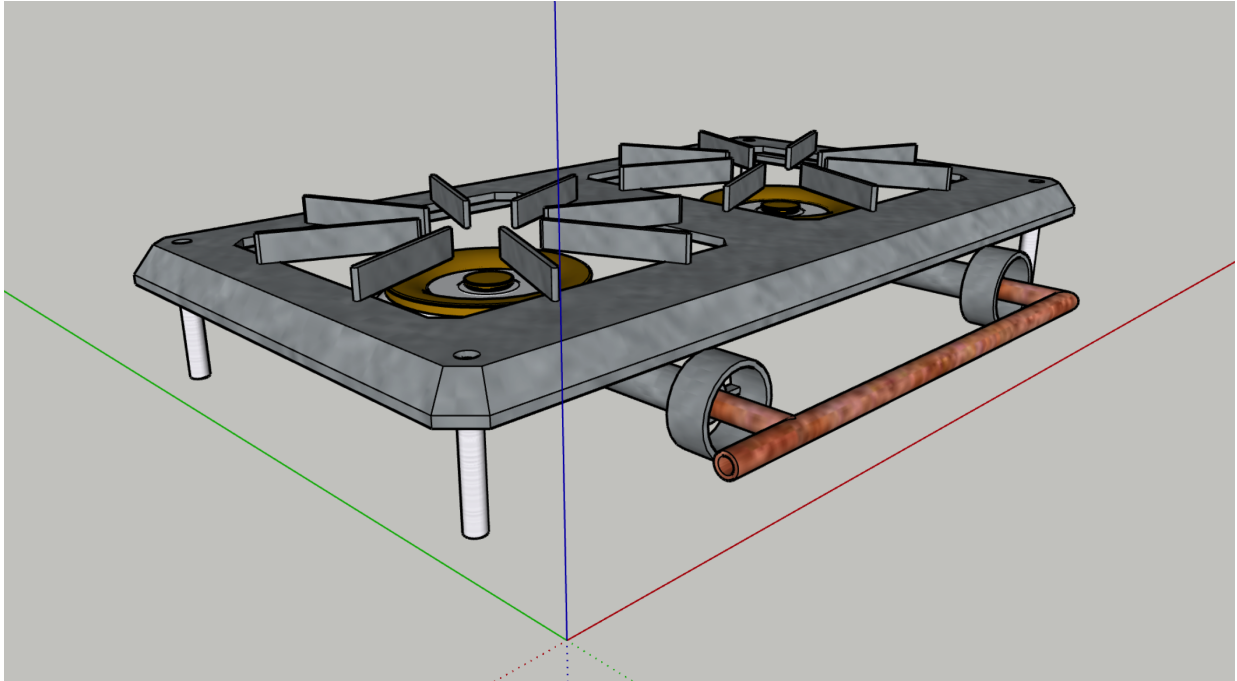

Sink

Drawing is model of 2nd hand caravan sink. Has a mixer tap fitted.

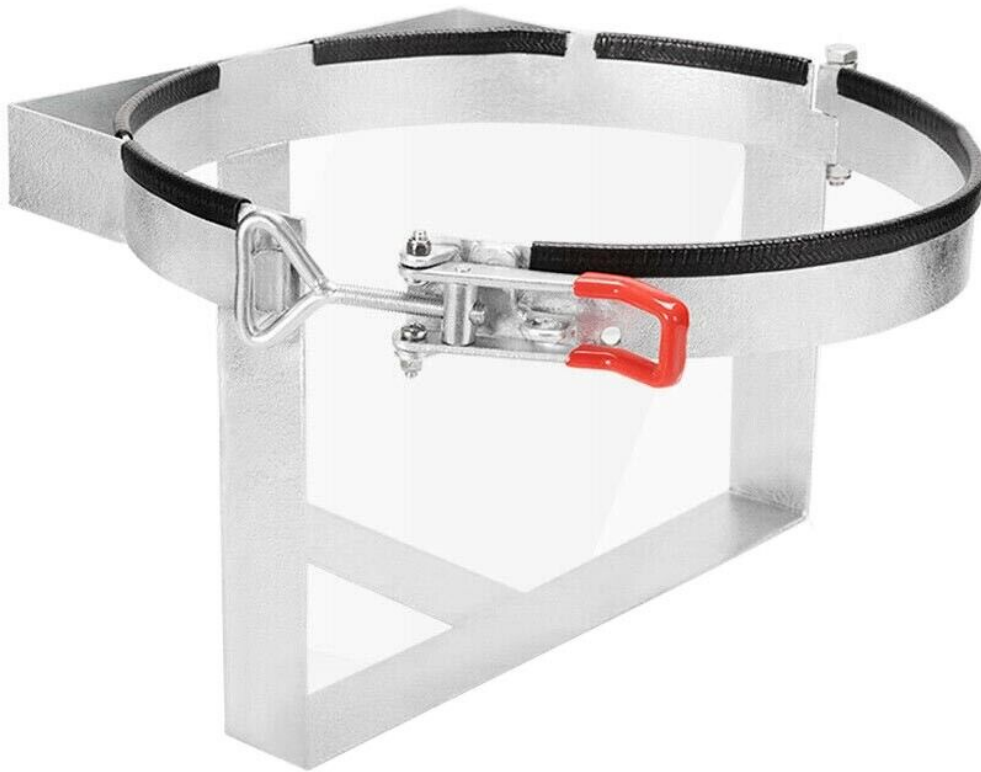

Stove

The stove has cast iron legs attached at the corners with bolts. By replacing the original legs with spacers (standoffs, angle, 15x15 RHS), & using longer bolts, the stove can be solidly attached to the benchtop.

Gas bottle holder

- [eBay purchase](#)
- To be modified to sit at approximately 45 degrees within the energy subframe.

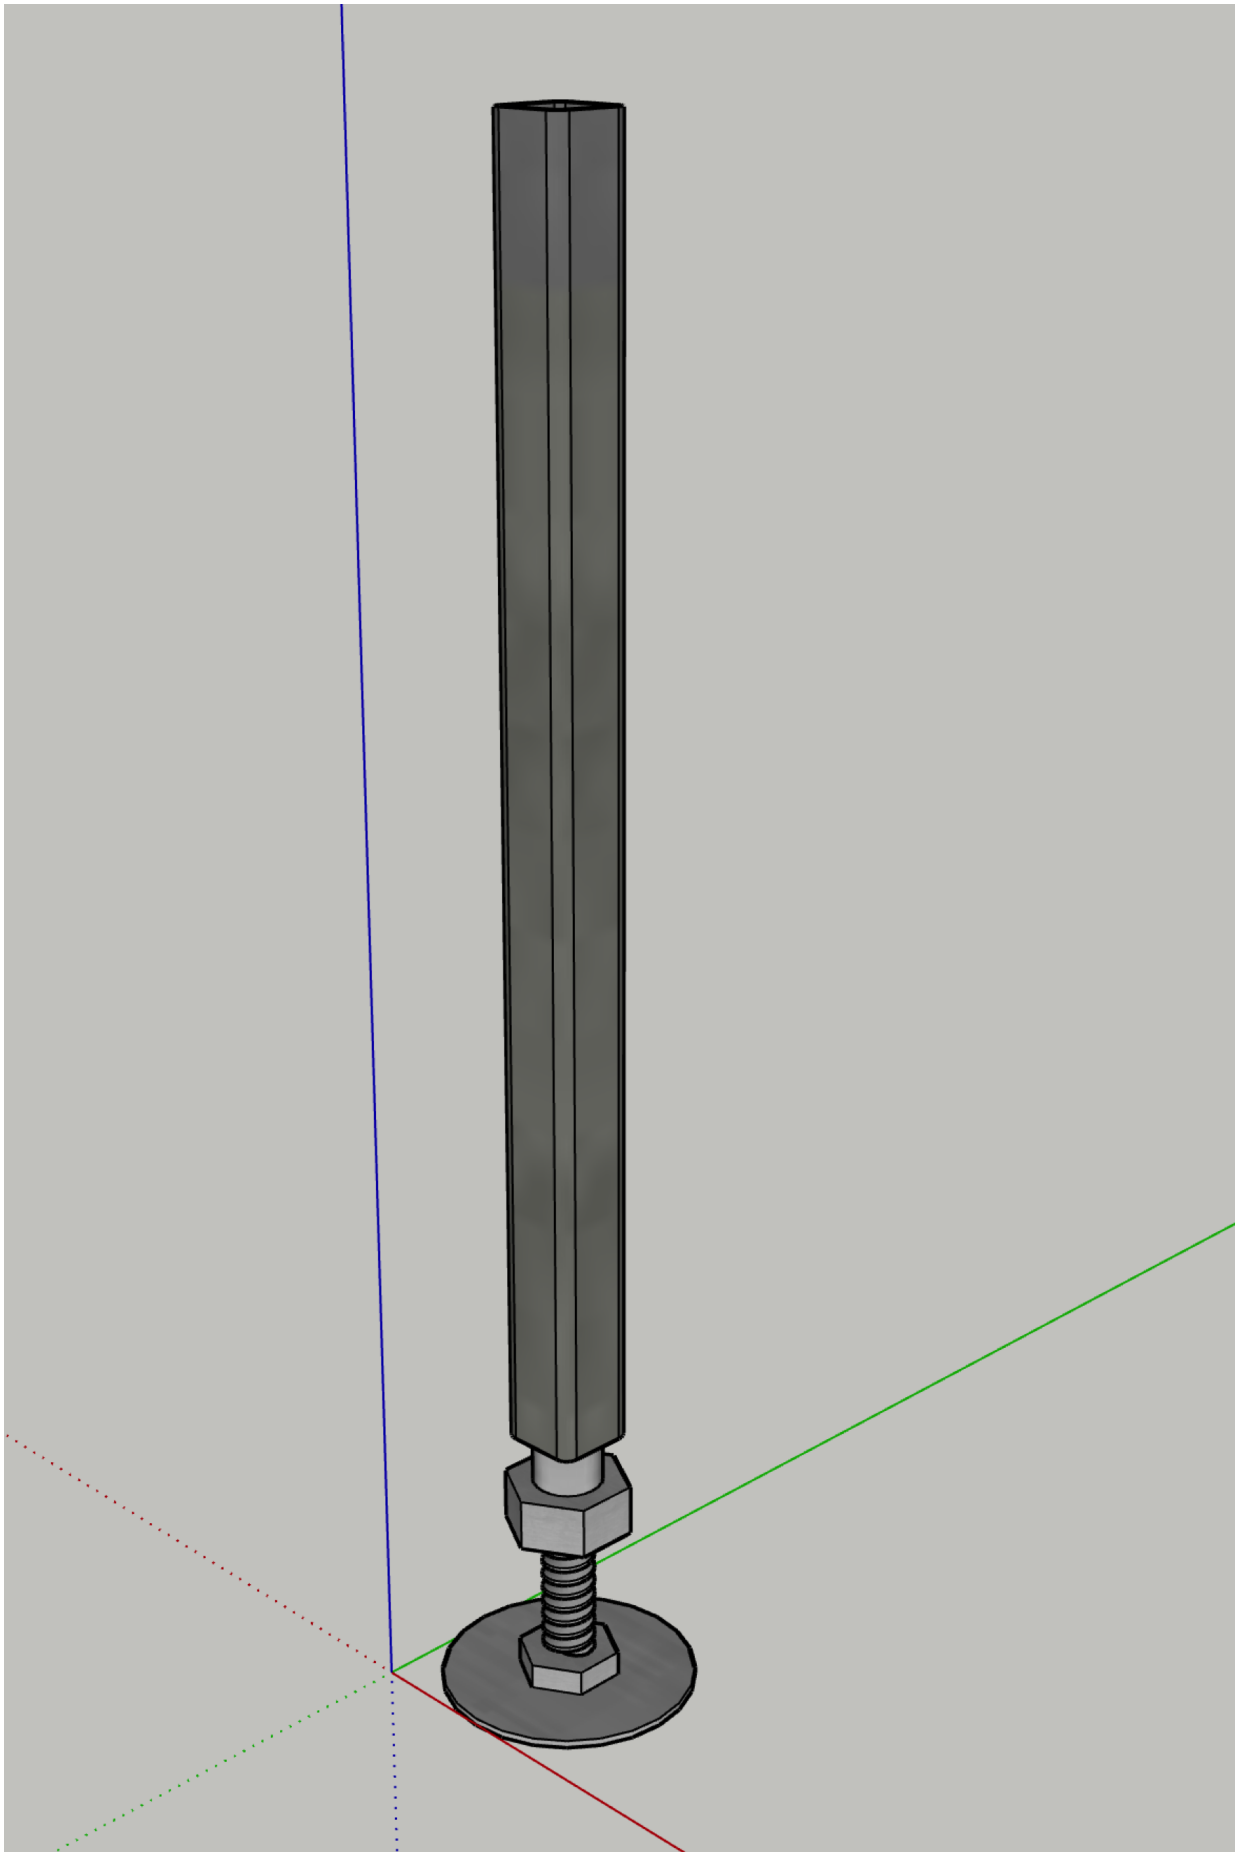

GAS BOTTLE HOLDER 4.5 KG LOCKABLE

Legs

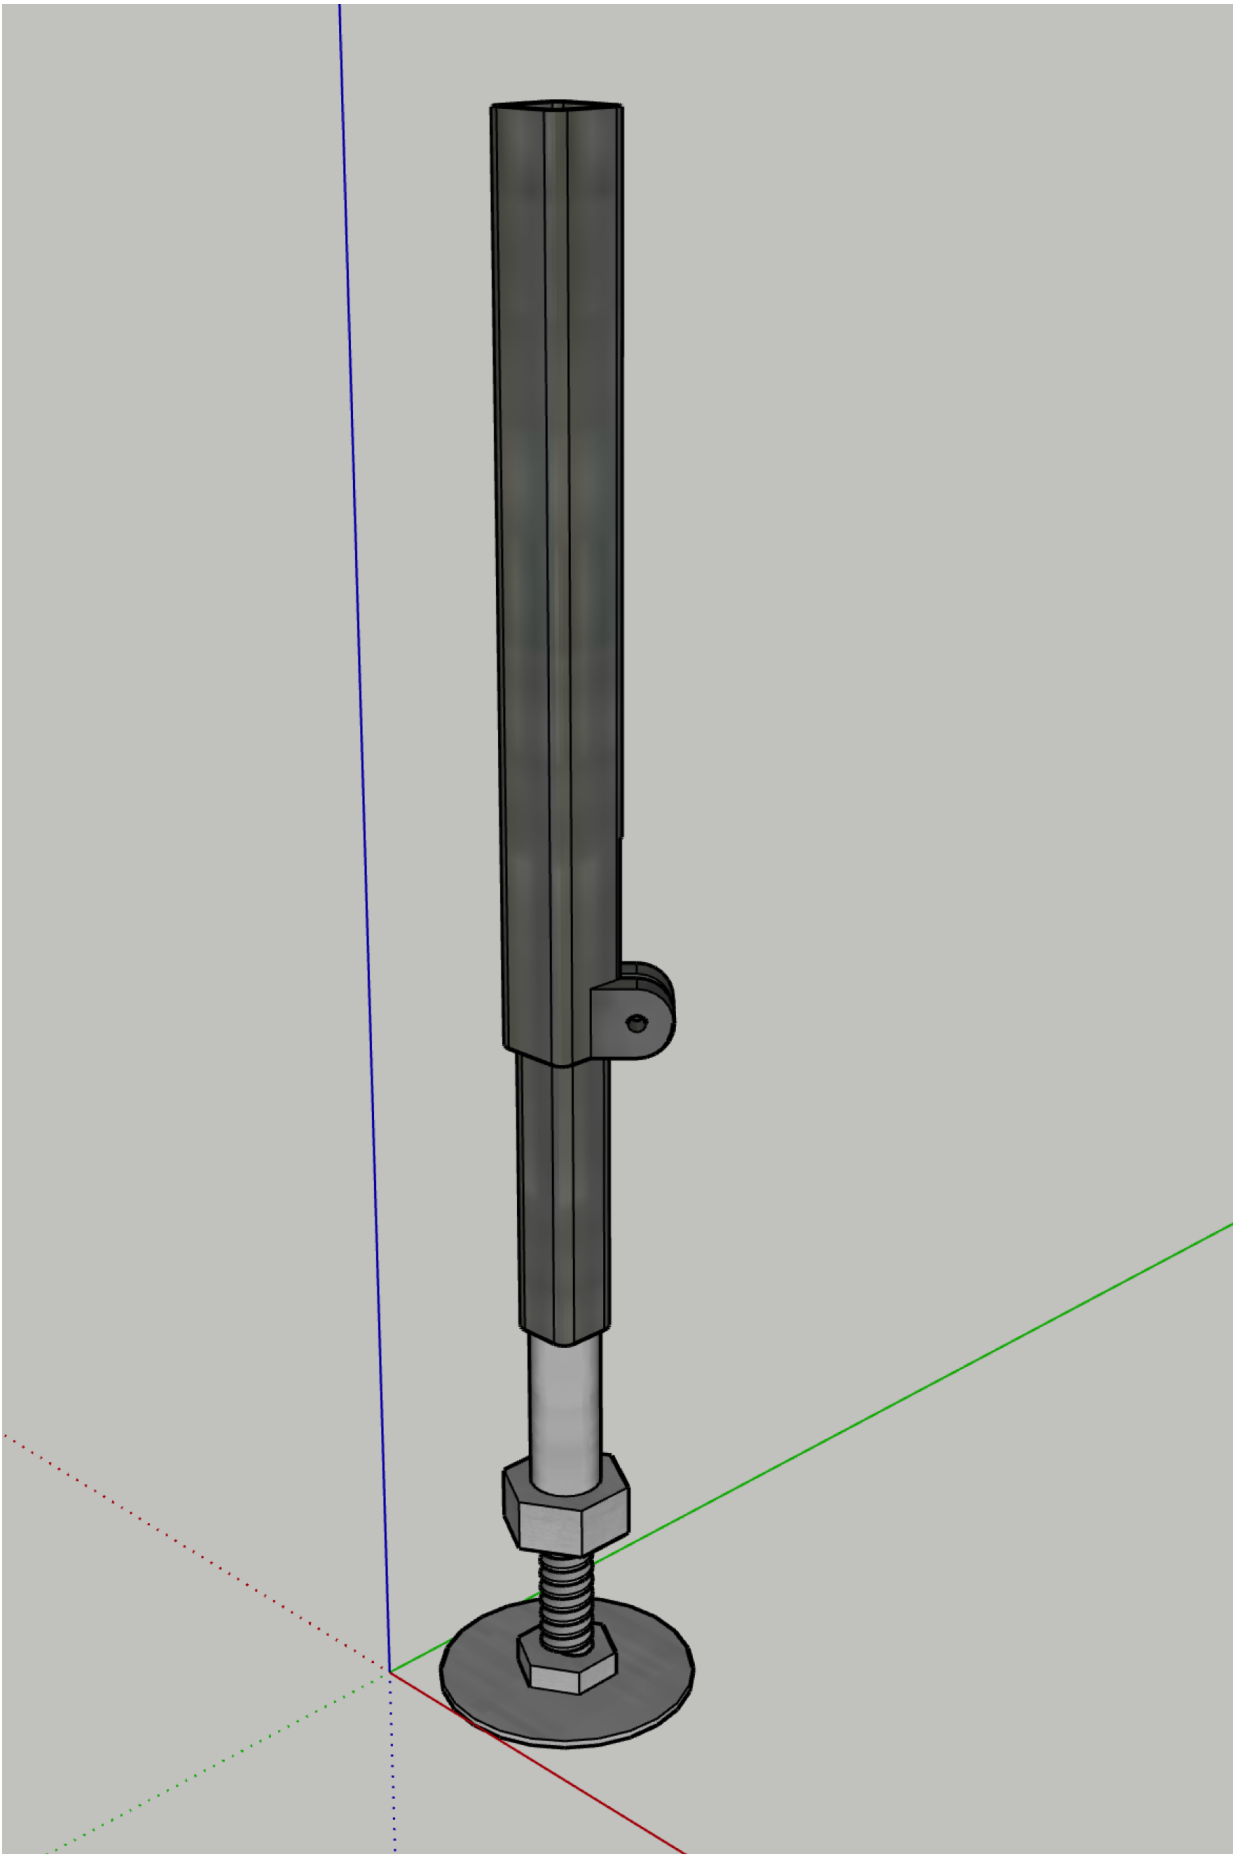

- The box should have 2 or 3 adjustable legs to support it in a level position in camp.
- The legs could either be permanently attached on pivots & swing down at camp setup, or be inserted into sockets at camp setup.
- Having a jockey wheel on one leg may be useful to provide support during camp setup.

Two possible versions are drawn...

Version 1, with screw adjustment only.

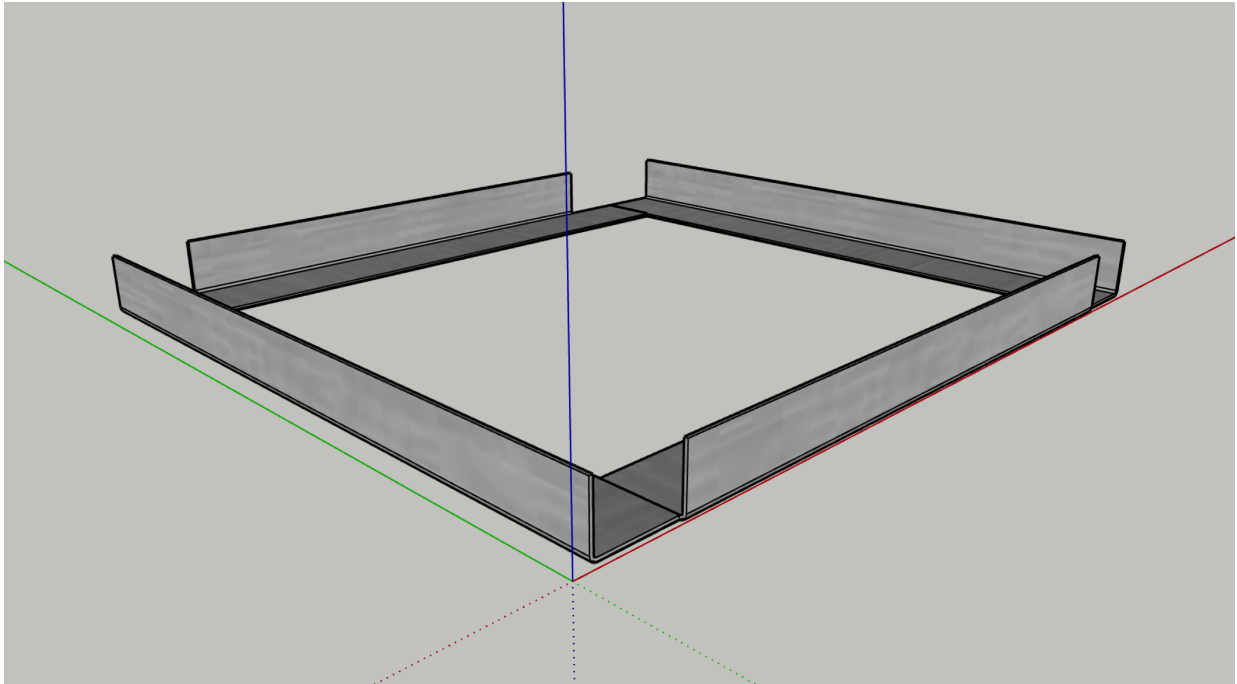

Version 2, with slide & screw adjustment.

Fridge Tray

- A rudimentary 'tray' to support the fridge between drawer rails.
- Vertical portions of the sides must be deep enough for attachment of drawer rails.
- The pilot light hole at the bottom RB corner of the fridge must remain unobstructed.
- The drawing uses 4 pieces of angle as described in the Sheet Metal file.

Caravan level

- [eBay purchase](#)
- To be mounted on benchtop as an aid to levelling at camp setup.

T Type Leveler

Caravan step

- [eBay purchase](#)
- To be fitted underneath Base.
- Selected item has lighting to be part of safety lighting.
